

Step by Step on How to Decompress a Croquis Zip File

FOR WINDOWS

1. Click to download your desired croquis template
2. When your browser's Download pop-up box appears,
 - a. In Internet Explorer: Click the down arrow next to Save and select Save As to save the file on your Desktop or wherever you want.
 - b. In Chrome: Click the up arrow next to the download pop-up and select "Show in Folder". From there, move the file to where you want to open it.
 - c. In Firefox: Choose either "Open with" or "Save File" and click **OK**.
3. Go to where you saved the Croquis zip file in the above step, then right click the filename, hover your mouse over "7-Zip" on the pop-up and select "Extract Here"
4. Multiple Croquis PDF's will appear next to the zip file. Just double click any one of the PDF files to open it, or open from Photoshop or Illustrator.

FOR MACS

1. Click to download your desired croquis template
2. When the Download pop-up box appears, click **Save** to your Desktop or to whatever folder you want.
3. After it gets downloaded, open the zip file and save the PDF files.
